

With his mischievous look, Coco is your childs perfect bedtime buddy.

Coco is a programmable Bluetooth or USB speaker, diffusing soft, adjustable light. Its paws are tactile! They include ON/OFF and play buttons with "next" and "previous" functions allowing you to change the playback tracks, from Bluetooth or on your USB key. Its ears are also functional. One allows you to adjust the intensity of the light and the other allows you to adjust the sound volume.

Coco can therefore be a real companion for your child throughout the day. Fully portable, thanks to its rechargeable battery, it can be taken anywhere.

Coco, the wireless speaker and night light, is part of the Hi Buddies! children's collection.
